Goals

I am looking for work in the Computer Science industry, generally in developing software applications and systems or writing code for web-based applications. I believe your company would greatly increase my skills in the programming languages you use and improve my career.

I am rigorous in my work and love challenges, I believe I can bring a fresh pair of eyes to your product(s) and reduce its ecological impact as I've studied Green IT.

Education

Studying for a French Higher National Diploma in Computer Science, *Institut Universitaire de Technologie (IUT) Bayonne, South-West of France*

French National Baccalaureate specializing in Computer Science and Contemporary English (equivalent to A levels with honours), *Lycée Saint-André, Niort, West of France*

Internships

2022 - Regard Félin La Boutique, E-Commerce selling cat products

Niort, West of France

- Initiation to the inner workings of online shops
- Discovered how to design and create an E-commerce and manage it
- Discovered how to create multimedia content for products and social media advertisements

2020 - SELLSY, Start-up producing a web-based Customer Relationship Management app

La Rochelle, West of France

- Initiation to the inner workings of Start-ups
 - Initiation to development, UX and UI design, marketing, and customer Support
-

Hard Skills

Competent in C++, Python and SQL with notions of JavaScript (JS), HTML, CSS and PHP

Notions in Networking, Cryptography and UNIX

Soft Skills

Critical Thinking, Adaptability, Problem-solving

Languages

Native French speaker and comfortable in English (*Cambridge, B2*)

Interests

Tabletop Roleplaying games, on both the Game Master and Player's side. Those have boosted my teamworking and critical-thinking skills as well as communicating ideas to other people.

3D modelling, while still an amateur, I find it fun and I believe it has helped me improve my attention to detail and obviously my creativity.
